

# Bunchkins Champagne Grapes

Bunchkins are a grape known by many names.

Their most common name is Champagne Grape, but they are also known as Black Corinths and sometimes even Zante Currants. HMC Farms simply refers to them

as Bunchkins because that is what they are; tiny bunches of seedless grapes that can be eaten one at a time or stem and all, whichever you prefer. They are perfect as a garnish, in a glass of champagne, or eaten as is.

## Royal item #2806

Look for Bunchkins in your grocery store anytime between June and September.
